

Mohd Sufyan Khan

Java Full Stack Developer

+91-7795031127 | sufyankhan.01127@gmail.com | Bangalore, India | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

Java Full Stack Developer with hands-on experience developing full-stack web applications using Java, Spring Boot, React.js, Hibernate/JPA, REST APIs, MySQL, and PostgreSQL. Built and deployed multiple production-ready applications with Spring Security, JWT authentication, and cloud deployment on Render. Oracle Certified Generative AI Professional with experience integrating AI-powered workflow automation.

Technical Skills

Programming Languages: Java, JavaScript, Python, SQL, HTML5, CSS3

Backend Development: Spring Boot, Spring MVC, Spring Security, REST APIs, Hibernate/JPA, JDBC, JSP, Servlets, Maven

Frontend Development: React.js, React Hooks, JavaScript ES6+, HTML5, CSS3

Databases: MySQL, PostgreSQL, MongoDB, Supabase

Developer Tools and Cloud: Git, GitHub, Docker, Postman, Render, Vercel, Jupyter Notebook

Core Concepts: Object-Oriented Programming, Data Structures, MVC Architecture, CRUD, Role-Based Access Control, REST Integration, Agile Development

Experience

Java Full Stack Developer Intern

Jan 2026 – Jun 2026

TAP Academy – Full Stack Internship with AI Integration

BTM Layout, Bangalore

- Engineered web applications using 8+ technologies including Core Java, Spring Boot, React.js, REST APIs, MySQL, Git, Maven, and Agile development practices.
- Created **UrbanEats**, a multi-user food ordering application supporting 2 user roles (Customer and Administrator) with 6 core modules including restaurant listings, menu management, cart, ordering, order history, and authentication using JSP, Servlets, JDBC, Thymeleaf, Apache Tomcat, and MySQL.
- Developed 15+ JSP pages, session-based authentication, CRUD functionality, and JDBC integration to deliver end-to-end web application workflows.

Applied AI Intern

Dec 2025 – Jan 2026

IBM SkillsBuild via CSRBox

Remote

- Designed a Health Service Agent that automated patient-doctor appointment scheduling using Python, Relay Agents, and Google Forms, reducing manual scheduling effort.
- Built custom slot-matching logic supporting multiple doctors and deployed the workflow on Render with Supabase, eliminating repetitive manual appointment allocation.

Projects

Food Express – Food Ordering Platform

[Live Demo](#) | [GitHub](#)

Spring Boot, Spring Security, Hibernate/JPA, REST APIs, MySQL

- Architected a full-stack food ordering platform featuring 2 role-based dashboards, JWT authentication, and 10+ REST APIs supporting restaurant, menu, cart, and order management.
- Delivered secure CRUD operations across 4 business modules using Spring Security, Hibernate/JPA, and MySQL before deploying the application on Render.

EBS Tracker – Expense, Budget and Savings Application

[Live Demo](#) | [GitHub](#)

Spring Boot, Hibernate/JPA, PostgreSQL, REST APIs, Render

- Created a personal finance application with 3 functional modules—Expense Tracking, Budget Planning, and Savings Management—powered by RESTful CRUD APIs.
- Leveraged Spring Dependency Injection, Hibernate/JPA, PostgreSQL, and a layered architecture before deploying the application on Render for cloud accessibility.

Education

Bachelor of Engineering in Computer Science and Engineering

Jun 2026

Basavakalyan Engineering College, Visvesvaraya Technological University

Basavakalyan, Karnataka

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Software Engineering, Computer Networks

Certifications

- Oracle Certified Generative AI Professional** – Oracle MyLearn
- Generative AI** – Infosys Springboard
