PROFESSIONAL SUMMARY

Java Full Stack Developer with hands-on experience building and deploying production-grade web applications using Java, Spring Boot, React.js, Hibernate (JPA), and REST APIs across MySQL and PostgreSQL databases. Delivered two full-stack applications and one AI automation agent from design through cloud deployment on Render, Vercel, and Supabase. Oracle Certified Generative AI Professional with practical exposure to AI-assisted development workflows. Strong fundamentals in OOP, MVC architecture, and RESTful API design, with a track record of writing clean, maintainable, scalable code.

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, Python, SQL, HTML5, CSS3
- **Backend:** Spring Boot, Spring MVC, REST APIs, Hibernate (JPA), JDBC, JSP, Servlets, Maven
- **Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3
- **Databases:** MySQL, PostgreSQL, MongoDB, Supabase
- **Tools & DevOps:** Git, GitHub, Docker, Postman, Render, Vercel, Jupyter Notebook
- **Concepts:** Object-Oriented Programming (OOP), Singleton Design Pattern, MVC Architecture, CRUD Operations, REST API Integration, Cloud Deployment, Agile Development

EXPERIENCE

Java Full Stack Developer Intern

Jan 2026 – June 2026

TAP Academy – Full Stack Internship with AI Integration

BTM Layout, Bangalore

- Developed and deployed full-stack web applications end-to-end using Core Java, Spring Boot, and React.js under structured mentorship, following industry coding standards and Agile practices.
- Built and tested 10+ RESTful API endpoints with Spring MVC and implemented Hibernate ORM for efficient, normalized MySQL database operations across multiple modules.
- Designed responsive, component-based React.js frontends with reusable UI components, React Hooks, and seamless REST API integration for real-time data updates.
- Applied AI-assisted development workflows alongside modern tooling to accelerate debugging, code review, and the overall Java Full Stack development lifecycle.
- Built UrbanEats, a multi-user food delivery platform supporting restaurant listings, dynamic menus, cart management, and order history, with secure authenticated user accounts for multiple concurrent users.
- Implemented core backend logic using JDBC for SQL operations and JSP with Servlets for server-side rendering, strengthening fundamentals in Java web development and session management.

Applied AI Intern

Dec 2025 – Jan 2026

IBM SkillsBuild (via CSRBox)

Remote

- Designed and built a Health Service Agent automating end-to-end patient-doctor appointment scheduling using Python and Relay agents, eliminating manual coordination steps.
- Integrated Google Forms for patient intake and implemented custom slot-matching logic to reconcile real-time requests against doctor availability tracked in Excel.
- Deployed the full solution on Render and Supabase, enabling a working production pipeline and significantly reducing manual scheduling effort for hospital staff.

PROJECTS

EBS Tracker – Expenses, Budget & Savings Application

Spring Boot, Hibernate, PostgreSQL, REST APIs,

Render

- Built a full-featured personal finance application with expense tracking, budget planning, and savings modules using Spring Boot and Hibernate ORM, backed by a scalable, production-ready PostgreSQL database.
- Leveraged the Singleton design pattern via Spring's IoC container to ensure a single managed instance per service component, improving resource efficiency and consistent application state across requests.
- Designed, documented, and exposed RESTful APIs via Spring MVC covering full CRUD operations across all three modules; deployed live on Render at expense-budget-savings-tracker.onrender.com.

Recipe Assistant Web Application

JavaScript, Spoonacular API, HTML, CSS

- Integrated the Spoonacular API to deliver dynamic, real-time meal planning and nutrition insights based on user-selected ingredients and dietary preferences.
- Built dynamic, multi-criteria search filters and responsive UI rendering in vanilla JavaScript, improving discoverability and overall user experience.

EDUCATION

Basavakalyan Engineering College, VTU

Basavakalyan, Karnataka

B.E. in Computer Science and Engineering

June 2026

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Software Engineering, Computer Networks

CERTIFICATIONS

- Oracle Certified Generative AI Professional – Oracle MyLearn
- Generative AI – Infosys Springboard
